TECHNICAL TALK - AND STATE RECOGNITION

Cincinnati Milacron, the largest machine tool manufacturer in the world, has donated a vertical computerized numerical control machining center valued at over \$100,000 to the Technical Division of Shelton State. The machine will be housed in the numerical control department of Shelton and will be shown to other companies while being used for the training of Shelton students. The vertical CNC machining center will be added to the coordinate measuring machine, a horizontal operation, which was purchased last year.

FEMCO Machine Company made the announcement this past week that they will open a manufacturing operation in the old Central Foundry complex. FEMCO vice-president, Eric Amundson, emphasized that one of the major reasons for choosing the Tuscaloosa location was the numerical control department at the Technical Division of Shelton State.
